

## Lecture 2 In-class practice

In “Lec2\_ExcelObjectModel.xlsm”, create a **module** named “practice”, then write a **sub** procedure in this module.

- Name of the sub is “**exercise1**”
- Use a message box to show the number of **rows** in “G1:I15” of sheet “Record2”
- Use a message box to show the number of **columns** in “G1:I15” of sheet “Record2”
- Copy data in range “G1:I15” of sheet “Record2” into sheet “MySheet” starting from cell “A1”. *Note: The destination of the “copy” method could be Range(“A1”).*
